Subject: Asphalt Liquid Analysis
Attachments: Letter to EPA Asphalt VP Analysis.pdf

Attached is a letter providing the results of vapor pressure analysis for liquid asphalt at Global's South Portland terminal. As noted in the letter, there was a delay between the liquid asphalt sample collection (associated with the asphalt tank air testing) and the analysis due to difficulty finding a lab to perform such a rarely requested test. This submittal fulfills Testing Order 7.b. of the 114 letter issued to Global dated November 2, 2011.
